Nodia, India

## Skill

- **C++**
- OOPs
- HTML
- CSS
- JavaScript
- React
- SQL
- DBMS
- Operating system
- MS Excel

## Education Background

### IMS Engineering College

*Bachelor of Technology in computer science and engineering*

SGPA- 7.3

2019-2023

## Internship

### Frontend developer

*TDPVista - 2 month*

- Developed a React site to display indoor and outdoor air quality indexes via APIs, integrating real-time metrics like PM2.5, PM10, and ozone levels, showcasing proficiency in **JavaScript, API integration, and frontend design** for impactful environmental monitoring.

## Summary

I am ambitious and hardworking individual with problem-solving skills. Proficient in C++, Web development. My objective is to secure a challenging position in the order to improve my skills and work for the growth of the organization.

## PROJECTS

### MUSIC PLAYER

- The application would include a music player for users to play music from several playlist
- The application would be optimized for different screen sizes and devices to ensure a seamless user experience on desktop and mobile devices.
- Employed frontend technologies: **HTML, CSS, JavaScript**, Bootstrap to create intuitive user interface

### Myntra Clone

- Designed and developed a responsive and dynamic website using **HTML, CSS, and JavaScript**, with a focus on user-centric design and performance optimization.
- This endeavor aimed to provide users with a similar browsing and shopping experience as Myntra's official website.

### YouTube Clone

- Designed and developed a dynamic website using **HTML, CSS, and JavaScript, React, Firebase and material UI** with focus on user-centric design and performance optimization.
- Key Features: User Authentication, Video Playback, Dynamic Content Rendering, Material UI Components, Realtime Updates

### Smaller Project in JavaScript

- To do app
- Weather app
- Quiz app
- Notes app
- Recipe app
